Brown Bag Lunchtime Seminar (Via Zoom)
(Theme: Social and Health Psychology)

Emotion Dysregulation in Children with Attention-Deficit / Hyperactivity Disorder

12:30 p.m. – 1:30 p.m. | July 22, 2022 (Friday)

Iris LAM Kit Yee
Ph.D. student
Department of Psychology
The University of Hong Kong

Abstract
Emotion regulation (ER) difficulties is a commonly reported but overlooked feature of Attention-Deficit/Hyperactivity Disorder (ADHD). Given the neuropsychological heterogeneity of the disorder, the role emotion dysregulation plays in ADHD in relation to other deficits such as executive functions (EF) has not been well understood. In addition, limited studies investigated parental factors which may influence ER and adjustment of the children with ADHD. Three studies were therefore carried out to address these research gaps. The findings underscored the importance of ER and its associations with parental factors and adjustment of children with ADHD.

About the speaker
Iris Lam is a final year Ph.D. student under the co-supervision of Prof. Tatia Lee and Dr. Kathy Shum. She previously practised as a clinical psychologist with an interest in supporting people with developmental disabilities and their families. She hopes to contribute to the betterment of support resources for this group through her research and practice.
