

THE BRAIN UNDER ATTACK

齊來認識 腦中風

目前，中風是全球第二最常見的死亡原因，影響著四分之一的成年人。大約三分之一的中風倖存者有嚴重殘疾，其中五分之一更患有認知障礙。

是次講座將由科學角度出發，去講解大腦於中風期間會發生的變化，亦會討論中風的成因、癥狀、診斷、治療和康復護理。

Stroke is currently the second most common cause of death globally and affects one in four adults. About a third of stroke survivors have significant disability and one in five will have cognitive impairment.

In this interactive lecture, the speaker will illustrate what happens to the brain during a stroke. The causes, symptoms, investigations, treatment and rehabilitation of strokes will also be discussed.

2023年4月2日（星期日）

下午二時至三時

Sunday April 2, 2023

2:00pm - 3:00pm
