What You'll Study?

Psychology is a broad and diverse field that taps into different aspects of the mind and behaviour. For example, the studies of human thought processes, personality, psychopathology, social interaction, biological processes that influence the mind and behaviour, how we grow, develop, and adapt at different life stages.

Many of Hong Kong's challenges, as well as other global cities' challenges in the near future, are social in nature, including aging population, income and social inequality, public health, and social support for people left behind by economic dislocation. There is an urgent need of psychology and mental health professionals in Hong Kong.
